25X1A

MEMORANDUM FOR:

Assistant to the Director

SUBJECT:

Scientific Advisory Board to the
Director of Central Intelligence

1. It is my understanding from Dr. Wheelon that it has been decided that the DCI's Scientific Advisory Board will continue to have an advisory relationship only to the DCI. Therefore, the thought that perhaps this Board should also have a relationship with the rest of the Intelligence Community will not be implemented at this time.

2. The above being the situation, I would assume it would now be appropriate to re-issue, in proper regulatory form, a notice or Headquarters regulation merely repeating the current responsibilities assigned to the Scientific Advisory Board.

MEMORANDUM FOR: Deputy Director for Science
and Technology

SUBJECT: Reactions of DD/S&T Offices to Value
of '████████ Committee' 25X1A

25X1A
1. Five Offices addressed themselves to the subject of the ██████████ Committee, the opinion of OCS not having been solicited. All five Office submissions are attached.

2. OEL, OSA, and FMSAC present no substantive observations. In all three cases, the Offices have had either no or insufficient relationship with the ██████████ Committee to 25X1A warrant meaningful opinions.

3. OSI and ORD have both submitted thoughtful comments. They address themselves not only to the ██████████ as 25X1A currently established, but further address themselves to the possibility that the cognizance of this Committee be extended to the entire intelligence community. Both memoranda are relatively brief and little point is served in preparing precis of them for you.

4. The ORD and OSI memoranda appear as Attachment A and the other three as Attachment B.

5. In the meantime, there remains to be handled the issue of perpetuating the charter, within the Agency regulatory system, of the Scientific Advisory Board. Attachment C contains the charter which expired on 1 August 1964, a memorandum from Kirkpatrick's office dated 30 July bearing on the matter, and a memorandum from Mr. ██████████ addressing himself 25X1A to this issue.
